Key Insights & Business Recommendations

Key findings from sales, product and customer behavior analysis

Overall Sales Performance

94 orders were placed by 50 unique customers, with 89 units sold. Total sales reached approximately 30K, with an average order value of 321.54.

Leading Brands

Under Armour is the leading brand with 19 units sold, followed by Adidas with 17. Puma and Reebok each sold 16 units, while New Balance, ASICS and Converse recorded significantly lower sales.

Pluggger Customer Insights

20 Pluggger customers generated approximately 11K in sales, with an average spend of 554.75 per customer. Pluggger customers therefore represent a meaningful share of the store's customer activity.

Sales Trend

Sales remained relatively low and stable throughout 2023. A significant increase occurred between January and May 2024, followed by a sharp decline from June. Further analysis is recommended to identify the factors behind this temporary sales increase.

Product Categories

Running is the leading product category by a significant margin, with 36 units sold, followed by Low-top with 17 units. This indicates strong customer preference for running footwear and may support inventory and marketing decisions focused on high-demand categories.

Business Recommendation

Regular customers show a higher average spend than Pluggger customers (approximately 635 vs. 555). This suggests an opportunity to strengthen the Pluggger loyalty program through targeted offers and incentives designed to increase member spending.
